wild heritage horses.*

HOW CAN WE HELP?

Sponsorship

The cost of feeding, worming and hay are borne by us. Sponsorship helps us cover these costs. Sponsor a brumby 'til it is ready to be offered for adoption. All our horses go through a training and handling program at the Sanctuary.

Support our Fundraisers

Buy a raffle ticket, Post cards, support our online auctions or attend an open day.

Donations

All donations over \$2 are tax deductible

Join Us

Become a Hoofs2010 Inc. member

Help Out

Can you fix a fence? Feed a horse? Work hands on with our brumbies? We welcome our members to come and help out.

Spread the Word

Tell your friends, join our Facebook group. Awareness is the key to helping these horses.

THE ROAD BEHIND!

It's been a huge year for us here and around Australia with wild horse eradication plans by our Government.

Also several crisis events such as horses starving due to government actions.

We have rescued the past 12 months over 20 brumbies and have also created the orphan foal program which saw 7 newborns come into 24 hour care, and an amazing job performed by our volunteers

"THE ROAD AHEAD"

The most pressing work for us at the moment is fighting to maintain the Barmah brumbies in their home, and also preparing to assist any we can if we do not succeed in our fight. A huge task to even contemplate, So we have a go fund me to try and purchase a larger sanctuary and put our expertise in wild horse rehoming into further practise. You can help by supporting one of our many fundraising options or giving a tax deductible donation of two dollars or more.

The picture above is of the Docker River orphans who we have worked to save, we are now fundraising to bring them back to the Sanctuary as they cannot remain where they are.

You can help us help them.

In closing the year ahead is going to be a hard road and we all will need to work together to ensure we have wild Horses remaining in the environment free as they have been for well over 100 years. Its also a great help to bring the topic up with your friends and discuss just why it is important to save the genetics while we can.
